

Devin Sibal

(919)-444-4268 devin@devinsibal.com

As a multidisciplinary digital artist I hope to work in a fast paced team combining many different types of media into a single, captivating, experience. My skills include video editing, videography, web and graphic design, and data analysis. My passion is creating digital media and learning new programming languages or libraries. Given this position I believe I can create impactful content in a team environment while also growing as a digital artist.

Education

Bachelor of Arts in New Media, concentration in Motion Media

Minor in Philosophy

University of North Carolina at Asheville, Asheville NC

My education at UNC Asheville was filled with classes from many different departments ranging from new media, computer science, philosophy, and sociology, among others. Having so many classes from different concentrations forced me to become well rounded and easily adaptable, while still primarily developing my skills as a digital artist.

Professional Experience

Intern Web Developer
UNCA's National
Environmental
Modeling and Analysis
Center

Jan 2017 - Oct 2017

- Communicated with my mentor and members of the team in order to plan projects and suggest improvements.
- Designed a news board to allow scientists using FCAV-NEMAC's GIS Platform- to communicate more easily.
- Visualized and interpreted cohort data from FCAV in order to understand how often they visit, the order of pages viewed, and more.

Dishwasher
Chai Pani

Feb 2016 - Jan 2017

- Worked with a large, fast-paced team in order to serve one of downtown Asheville's most popular destinations.

Technology Sales
Associate
Staples

Jan 2015 - Jan 2016

- Provided service and tech support to the customers visiting Staple's technology department.
- Stocked shelves following product display guides, took inventory, and used POS software to check customers out.

Volunteer Experience

Orange County Rape Crisis Center

- Taught high school classes on consent, sexism, and systemic oppression.

- Entered and interpreted data from thousands of responses students gave before and after taking these classes.

Skills and Personal Projects

- Maintaining my own VPS in order to host my portfolio and various web apps I've created.

- Web app research project done in Python analyzing the language used in music reviews and how the artist's gender effects it.
